ABOUT CINTAP

Cintap

CINTAP is a cloud-based software suite that allows you to centralize, integrate, automate, and streamline all your back-end business processes and transactions so that you can focus on what matters the most: your business.

A Cloud based Integration Platform that makes it easy for you to onboard your partners, customers.

Cloud Integration Modules

CINTAP Cloud Platform consists of three core modules: Integration, Business Process Management (BPM), and Connectivity. Each module provides a range of unique features to enable seamless integration, centralization, automation, management, and monitoring of all your business operations.

Full Service Management

CINTAP Cloud Platform started off as an IPASS startup with a huge mission of helping businesses like yours connect through a platform that equips you with the ability to automate and gain control over your internal business processes. Our goal is to change the way businesses operate by connecting them through a cloud-based platform that allows for seamless integration and centralization of business transactions.

Making a Difference

After just 4 years into the IPASS space, here we are today serving 500+ customers in handling their business processes better. Our commitment to simplifying business processes is what made us a trusted business aide for large enterprises in a short span of time.

WHY CINTAP

- Multiple Industries
- Scalable Solution
- Quick Integration And Automation
- One Solution
- Full - Service EDI Management

Multiple Industries

We know that your business can't afford to get stuck with an expensive, difficult-to-use system that doesn't work well with your business model. That is why we have designed CINTAP Cloud Integration to be flexible, adaptable, and customizable, so it can fit into any size industry or company. It is the best solution for small businesses as well as large enterprises.

Scalable Solution

The cloud-based EDI management solution seamlessly integrates with your existing systems and processes. It has been built using the latest frameworks and technologies, making it highly secure and reliable. CINTAP Cloud Integration allows you to manage all your EDI transactions from one central location.

Quick Integration And Automation

CINTAP Cloud Integration is an iPaaS software that provides quick EDI integrations and automation solution to businesses. Our cloud integration platform is designed to make it easy for you to integrate your business with others, while automating the processes that make your business run.

Full Service Management

CINTAP Cloud Integration is the right solution for all your EDI management needs. When you are ready to take your company to the next level, we are here to help. With full-service EDI management capabilities that allow you to manage all your business transactions in one place.

One Solution

CINTAP Cloud Integration simplifies your business operations and makes your business more efficient. It is a single solution to all your business operation concerns by automating the process of managing your company's processes in real-time.

FEATURES

Easy EDI Integration Partner Onboarding

CINTAP Cloud offers a single click easy partner onboarding with just 2 minutes. It's agile, flexible and fast. The CINTAP cloud is a comprehensive integration platform that makes it easy for you to onboard your partners, customers and contractors. No more filling out forms, sending files back and forth or waiting in long queues. This solution allows you to onboard anyone within a few clicks without any hassle.

EDI Converter

EDI is a pain. It is complex, expensive, and it is hard to use. But at CINTAP, we believe that EDI doesn't have to be this way. That is why we created our cloud-based EDI converter—so businesses like yours can seamlessly change their existing files into formats compatible with all your stakeholders.

Integrated Cloud Support

Businesses are in a constant state of flux. Your business is no different. You're constantly adapting to change, incorporating new products and services and changing the way you do business to stay competitive. On top of that managing multiple vendors manually or with inefficient automation and integrated solutions can be a nightmare.

Automation

We know how important it is to stay on top of your game to avoid being run over by your competitors. And we also know that juggling between multiple tasks and vendors is hectic. With CINTAP Cloud Platform, you don't have to be stuck in tedious administrative tasks all day.

Transaction Trail

Companies today need to integrate their operations quickly and efficiently. CINTAP Cloud Platform is designed for companies that want an easy-to-use, flexible solution for managing their transaction integrations.

Conversions

CINTAP Cloud Platform is built on the principles of simplicity and efficiency. It allows users to integrate with any platform without having to deal with complex codes or configurations for businesses of all sizes and industries.

SERVICES

Automation

When you run a business, every second counts. And when it comes to running your business, you want to make sure that each and every interaction with your vendors and partners is as efficient and Businesses can eliminate manual processes, increase the speed and efficiency of data exchange, reduce costs.

Business Transaction Automation

CINTAP's Data Integration Services help businesses automate their business transactions with their vendors and partners. It provides a web-based application that enables users to execute, track, and manage all their business transactions in one place.

Transaction Management

CINTAP's Data Integration Services allow you to view all transactions of your company and its associated vendors in one place, as well as generate reports based on those transactions for better business insights.

Integration

CINTAP Data Integration Services are designed to be compatible with any type of business, from small businesses to large corporations, allowing you to manage every aspect of your company's operations from anywhere in the world!

SOLUTIONS

Friction Less Business Transactions

CINTAP Cloud Data Integration Solutions provide a fully managed customized service that allows you to leverage the benefits of electronic data interchange (EDI) without the hassle of deploying, managing, or maintaining your own EDI system. Increase operational efficiency with automated data exchange. Streamline vendor relationships using consistent messaging standards.

Speed

CINTAP Cloud's EDI integration allows you to quickly and securely streamline your B2B transactions. Our EDI integration ensures that your business transactions are fast, efficient, and secure. Our Data Integration Solutions are designed to handle the most complex and dynamic vendor relationships, even when they involve a multitude of parties, multiple document types, and multiple steps in the process.

Powerful Automation

With CINTAP Cloud's EDI integration, you can create new orders in your ERP and have them automatically transmitted to your vendors' systems via CINTAP Cloud. This means that when you are ready to place an order with a vendor, all you have to do is schedule it in CINTAP's Data Integration Solutions -no more back-and-forth between the two of you!

Interactive And Customizable Dashboard

At CINTAP Cloud, we believe that EDI integration is the key to a more efficient business. In fact, we have built our entire system around it. Our integrated EDI platform allows you to quickly and easily set up your own custom dashboard to access all the information you need, when you need it.

No-Code

CINTAP Cloud is an IPaaS platform that provides a centralized solution for managing all your EDI transactions. It helps you to improve the efficiency of your business operations by streamlining communication between channels and departments within your organization and with other organizations.

Time Saving and Efficient

CINTAP Cloud's EDI integration ensures frictionless business transactions between your vendors and your business. Our cloud solution is designed to help you automate your business processes and ensure seamless, automated communication with your vendors.
